

UCC Innovate Portal

Deliver and Manage Solutions that matter

As a business partner for your customers, you need to stay in control and support their services no matter how complex.

The Innovate Portal is a secure web-based portal enabling partners to design, build and manage multiple customer solutions.

One Simple Process

The Exponential-e 'Collaborate' portal has been designed and developed to support both wholesale and resale within the UCC marketplace. Simple deployment enables you to manage users, licences and stored services. Before building customer services, build your own UCC portfolio. Use

existing templates or leverage licence packs to build your own unique proposition, stand out from the crowd.

Provision, plug and play, it's that simple.

Create the user, plug in a phone or install a soft client and your customer is up and working.

The portal branding can be customised, and you can manage role-based administrator access. If you want your customer to manage move, adds and changes themselves then simply provide them with access to a portal with your branding or that of your customers', giving them control and flexibility they want.

FEATURES

- **Customise the portal** to your brand and your domain or that of the customer.
- **Configure and manage** your unique service offerings.
- **Define what services can be viewed** and accessed by end-users.
- Plan and control the **bulk provisioning** of users with a mapped csv worksheet.
- **Administration access for user groups** enables control of simple changes.
- **Custom shortcuts** provide links to the most used applications for billing, call recording, UC-One installation, toll ring and other portals.
- The **user experience** is consistent across any device, browser, and operating system.
- The **site interface** features a responsive design with a modern look and feel.

BENEFITS

- Market differentiation to increase revenues and maximise profits.
- Efficient Operations. Invest less time and money to gain valuable capability
- Ownership of book to bill.
- Maximise administrator productivity.
- Superior customer experience.

Why Exponential-e?

Exponential-e Unified Communications provides a full collaboration suite integrating all the tools you need to empower and future-proof you and your customer's business.

At Exponential-e, our support infrastructure is the foundation of our success. Customer care services are all provisioned within the UK by highly skilled engineers. Developing your relationship with Exponential-e will help your business establish and grow its position in the UCC marketplace.
